

# **Voter Participation Center – Voter Behavior among RAE Women**

Banners from an online survey of 1,133 Registered Women of Color and Unmarried Women Under Age 55 in Battleground States

August 17 – 27, 2020

## SURVEY METHODOLOGY

Lake Research Partners designed and administered this survey. It was conducted online from August 17 – 27, 2020. The survey reached a total of 1,133 unmarried women under age 55 and women of color in select battleground states. All were registered voters.

The data were weighted slightly by age, region, party ID, race, education, marital status, and parental status.

In interpreting survey results, all sample surveys are subject to possible sampling error; that is, the results of a survey may differ from those which would be obtained if the entire population were interviewed. The size of the sampling error depends upon both the total number of respondents in the survey and the percentage distribution of responses to a particular question. For example, if 50% of respondents in the sample answered “Yes” to a particular question, we can be 95% confident that the true percentage will fall within 2.9 points, or from 47.1% to 52.9%.

**Margin of Error**  
**For Different Percentage Distributions and Different Sample Sizes**  
(95% confidence)
